PUBLIC WORKS DEPARTMENT

DONoP.1093

Hyderabad No.14.
19th November, 1951.

My dear Bedekar

The Government of Hyderabad has ordered out three 1000 K.W. Turbo Alternators, complete in every respect, from Westinghouse Ltd., and they are ready for despatch there and can arrive here within two to three months. As things are at present in Hyderabad, we do not urgently need these sets and our Government thinks that they can be disposed of to the Government of Bombay to great advantage in view of the plectric power shortage at present prevalent in the Bombay State. My Minister desires that the Chief Electrical Engineer of this Government, Shri Abdul Quader, should if possible, meet Honourable Dr. Jivraj Mehta in this connection and explain this Government's intentions to him.

I shall be grateful if you can kindly arrange for the necessary interview with the Honourable Minister.

Thanking you,

Yours sincerely,

(N.V.S. Murti)

Ref No. NVC:BRW

The Chief Engineer ,
Electric Grid Offices,
Mercantile Bank Building,
Fort, Bombay.

Dear Sir,

Jog-Karnatak Electric Grid Scheme
Substation Switchgear and Transformers - Insurance

In continuation of our letter Ref:NO.NVC:BRW of 20th ult. we give below the reply from the Exchange Control Authority in regard to the question of settlement of claims in U.S. Dollars :-

"With reference to your letter No.NVC:BRW dated the 20th July 1951, we have no objection to your insuring the machinery and plant to be imported from the U.S.A. in U.S. Dollars with claims payable in U.S. Dollars. In the event of a claim arising as a result of short-supply, damage or loss in transit, we would be prepared to allow the claim amount settled in U.S.Dollars to be utilized for payment of the cost of the replacement goods provided a 'Replacement Licence' is obtained and the amount is endorsed on the exchange control copy of the replacement licence"

P.T.O.

Letter.
Very Urgent

No.T.8/C-2/ 3067
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay, 1. 27 October, 1951.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:- Jog-Karnatak Electric Grid Scheme
Insurance of Sub-Station Equipment.

Orders for the complete Sub-Station Equipment for the above Scheme has been placed with Messrs. International General Electric Co. to be imported from U.S.A. Normally Messrs. International General Electric Co. would have insured this equipment with their usual American Insurers but according to clause 6 of our order letter No.T.8/C-2/874 dated 9-1-1951 (copy endorsed to you), the insurance of this equipment is to be effected with a well-established Indian Company mutually acceptable to both parties, provided an assurance can be had from the Government of India, that should any ~~clause~~ claims arise, the foreign exchange in U.S.dollars will be made available, This clause was introduced in conformity with the instructions of Government contained in their letter No. D.D.4 1/25111-F dated 14-9-1950.

(2) papers are under up to C.E., B.C.I.

Accordingly we negotiated with Messrs. New India Assurance Co.Ltd. Bombay for insurance of the above equipment. It was not considered desirable to issue a public inquiry for this insurance. Hence only Messrs. New India Assurance Co., a well-reputed firm who have handled similar types of insurance of this magnitude before, were addressed in the matter. They have quoted the following ra

1) Cover against all risks of physical loss or damage including breakage from free alongside steamer, New York until arrival at site in India including installation risk until completion of each individual ~~risk~~ unit 0.67%

2) Current War & Strikes, Riots and Civil Commotion Risks 0.18 net

Total 0.85%

The cover provided by Messrs. New India Assurance Co. is identical with ~~lower than~~ that offered by the American Insurers of Messrs. International General Electric Co., who have .....

have quoted 0.875% for similar cover. It is not known at present whether the American Insurers have included fire risk also in their rates. This question has been referred to them by Messrs.International General Electric Co. and their reply is awaited. But Messrs.New India Assurance Co. have given an assurance that if the American-Insurers of Messrs.International General Electric Co. have included this risk in their rates, they would be prepared to do the same without additional premium. Further, Messrs.New India Assurance Co. have obtained the necessary assurance from the Government of India that in the event of any claims arising, the necessary foreign exchange in U.S.dollars will be made available for payment of such claims as per their letter No.NVC:BRW dated 1-8-1951(copy enclosed).

Messrs.International General Electric Co. are agreeable to this arrangement of insuring the equipment with Messrs.New India Assurance Co., whereby the premium will be payable in rupees and claims, if any, payable in U.S.dollars.

Pending finalisation of the main insurance, question, we have authorised Messrs.International General Electric Co. to insure 3 small consignments, which have already been shipped from New York, with their usual American Insurers. But for the major consignments of this equipment it is proposed to place the insurance with Messrs.New India Assurance Co. The first big consignment of this equipment is expected to be shipped from New York very shortly and in view of this, very early approval of Government is requested for placing the insurance with Messrs.New India Assurance Co.under terms and conditions stated above.

BK Prasad
Chief Engineer. 27/10/51

Ballard Estate, BOMBAY 1.

Sub:- Jog Karnatak Electric Grid Scheme
Insurance of Sub-Station equipment.
Ref:- Your No.BO-18922/PSK-30823 Dt.25-10-1951.

Dear Sirs,

Pending finalisation of the main insurance with M/s. New India Assurance Co., you may insure the circuit breakers for Harihar Sub-Station of the approximate value of $10,185 lot f.a.s. vessel, New York with your usual insurers in U.S.A. in order to avoid risks. The insurance of the above material should be extended upto arrival at erection site and thereafter until completion of erection.

This confirms the verbal assent to the same effect given by me to your representative, Mr. N.Subramanyam.

Yours faithfully,

Chief Engineer.

BM/29.10. Copy forwarded with compliments to the Secretary, Public Works Department, Bombay. This has reference to this office No.T8/C-2/30679 Dt.27-10-'51. As the circuit breakers are ready for shipment, it will involve heavy storage charges in U.S.A. if they are not shipped immediately which can only be done after insurance instructions are received by the Principals of M/s. I.G.E.Co. Their representatives

P.T.O.

10

explained the position and hence the above instructions are given in anticipation of the approval by Govt. Very early approval of Govt. to the recommendation of placing the main insurance for the sub-stations equipment with M/s. New India Assurance Co. are requested.

pp 3-4

The C.E., B.E.G., for the reasons given, requests Govt. that he may be allowed to insure have the sub-station equipment for the Jog-Kasaratk Scheme insured with M/S. New India Assurance. The C.E. states that normally M/S. International General El. Co., with whom orders for the equipment have been placed would have insured the equipment with their usual American Insurers but according to the order the insurance is to be effected with a well-established Indian Co. mutually acceptable to both the parties.

2. The C.E. states⊗ that it was not considered desirable to issue a public enquiry for this insurance. Hence, he adds that only M/S. New India Assurance Co. a well reputed firm, who have handled similar types of insurance of such magnitude before, were addressed in the matter and they have quoted 0.85% of the total cost against 0.875% by the American Insurers for similar cover. The C.E. has not given any reasons whatsoever why it was not considered desirable to issue a public enquiry. He may therefore be requested u.o. to elucidate the position. He may also be requested to state the amount involved in this insurance.

⊗ pl. see "A" at p. 3

3. Action with refce. to C.E's endt. at pp. 5-6 ante will be taken on return of papers from him.

6/11/57

Dy. Secy (DrE)

Secy.

It is not necessary, or desirable to advantageous to invite quotations from or

tenders for "insurance" -

notes of the reputed firms are not identical as they vary greatly in their terms and may not enter into any comparison of quotations.

9- 13

Finance Department.

The action of the C.E. in allowing the International General Electric Company to insure a part of the consignment required for the Jog-Karnatak Electric Grid scheme with their American insurers may be approved.

2. The important question is with whom should the balance of the consignment be insured. Should it be with the New India Assurance Company or the Pool or with the Insurance Fund? Since all insurances with a private insurer are to be given to the Indian Insurances Companies' Association Pool, the question of insuring the Electrical machinery with the "New India" is out of question. The question then remains whether the Insurance should be effected with Insurance Fund or with the Pool. Grid is a commercial undertaking and if the property in the goods passes to Government at the part of its shipment in U.S.A. then certainly the particular consignment ought to be insured with the I.F. Otherwise the International Co., should be asked to insure with the Pool- in any case, not the New India Assurance Company.

3. The P.W.D. may be informed accordingly.

12.xi.51.

Strictly all Govt. ~~Govt. sponsored~~ insurances, when effected with a private insurer, are to be effected with the Pool. This, however, does not appear to be a Govt. insurance, but only a Govt.-sponsored one. Still it should be given to the Pool according to the general Govt. policy. I think as the insurance is to effected by the American Electric Co., it appears that ownership of the goods does not pass to the Govt. at the port of shipment in America. The insurance cannot then be effected by the I.F. I agree with A above.

No.T.8/C-2/ 31455

Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay.1. 8 November, 1951.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:-Jog-Karnatak Electric Grid Scheme.
Insurance of Sub-Station Equipment.

Reference:-1)This office letter No. p.3
T.8/C-2/30679 dated 27-10-1951
2)This office endorsement No. p.5
T.8/C-2/30781 dated 1-11-1951.

I invite a reference to this office letters quoted above wherein we have requested Government approval for insuring the above equipment with Messrs.New India Assurance Company, Bombay and wish to state that 3 small consignments which have already been shipped from New York have been insured with the usual American insurers of Messrs. International General Electric Co. Subsequently we have authorised Messrs.International General Electric Co.(copy forwarded to Government) to insure one more small consignment with their usual insurers, as this consignment has already been shipped. Besides these four small consignments, Messrs. International General Electric Co.have advised that a few more small consignments are available for shipment. Also the first big consignment consisting of transformers is expected to be shipped very shortly. Messrs.International General Electric Co. are pressing for instructions about insurance As the materials cannot be shipped in the absence of insurance instructions, any delay on our part in the issue of these instructions will result in storage charges as per terms of the contract.

In view of the above I request very early approval of Government for placing the insurance with Messrs New India Assurance Co.under terms and conditions as communicated under this office letter quoted above

Letter.

No.T.8/C-2/ 31487
Electric Grid Offices,
Mercantile Bank Building,
Fort, Bombay 1 : Dated 17 November, 1951.

To

The Secretary to Government,
Public Works Department,
Bombay.

Sub:- Jog-Karnatak Electric Grid Scheme -
Insurance of substation equipment.

Ref:- This office letter (i)T.8/C-2/30679 dated 27-10-51.
(ii)T.8/C-2/31455 " 8-11-51.

I enclose herewith a copy of Messrs. International General Electric Co's. letter No.BO.18922/PSK-30222 dated 25-10-51 and subsequent reminder BO.18922/PSK-30376 dated 9-11-51, wherein they have advised that oil for power transformers involving a total of 780 drums is available for shipment. The approximate cost of the oil is $ 13,237. Messrs. International General Electric Co. have advised that due to the critical shortage of shipping drums, it is becoming very difficult to obtain oil and hence, unless instructions about insurance of this consignment are issued to them immediately, they may not be able to obtain the oil for a considerable length of time.

Government have already been addressed for approval for placing the insurance for substation equipment with Messrs. New India Assurance Co. vide this office letters quoted above. It is requested that very early orders on this issue may now be passed to enable me to deal with the above reference from Messrs. International General Electric Co.

If, however, final orders on this office letter of 27-10-51 cannot be issued for any reasons, it is proposed to authorise Messrs. International General Electric Co. to insure this consignment of oil with their usual American insurers as in the case of four previous consignments as otherwise the shipment of oil will be delayed considerably.

Suitable orders of Government in this matter may please be obtained very urgently.

T. J. Mechandani

Dear Sir,

JOG KARNATAK ELECTRIC GRID SCHEME
YOUR ORDER T-8/C-2/874 DATED 9th
JANUARY 1951- SUBSTATION EQUIPMENT.

We have just now received communicatfen from our Principals advising that the oil for the power transformers will be available shortly for shipment involving a total of 780-drums of oil having a total approximate gross weight of 390,000 lbs. We are also advised by them that due to critical shortage of shipping drums it is becoming very difficult to obtain oil. At the present time they have a commitment from the supplier to furnish the required quantity provided shipping instructions can be given promptly.

However, in the absence of finalisation of the main insurance from your end shipping instructions cannot be complete. We shall therefore be glad if you will expedite the issue so that supply position of the drums can be taken advantage of and arrangements made for the shipment, as otherwise our Principals feel that they may not have an opportunity to obtain the oil for a considerable length of time.

Yours very truly,

Dear Sirs,

With reference to the above letters wherein you have asked us for insurance instructions, in respect of the above contract and further to the discussions our Shri.R.P.Desai Superintending Engineer(Transmission), Shri.A.V.BheemaRao and Shri. P.R.Krishnaswamy of the Indian Insurance Co.'s Association Pool had with your Shri.N.Subramanyam on 11-12-1951, I wish to inform you that you may please arrange to insure all the equipment to be shipped hereafter including the consignments mentioned in the letters referred to above with the Indian Insurance Companies' Association Pool, Industrial Assurance Building, Churchgate, Bombay. The amount to be covered for insurance on the whole order will be £ 882,269 F.A.S.Vessel New York which takes into account the increase in cost subject to the ceiling of 10% of the value and reduction of £ 40,720 for which insurance has already been covered by you with your usual insurers in New York for the equipment already shipped. To the above value the freight and customs duty has to be added to arrive at the total insurable value of the equipment. The actual value for which an open policy has to be taken on the basis of the above may please be intimated to the above Pool under advise to this office. The policy may be taken out in your name as agents of this Department, as suggested by you.

The coverage for this insurance will be similar to those offered by your usual American Insurers and will

cover...

cover the following risks: All goods and merchandise under and/or on deck should be insured against all risks of physica loss or damage to the property insured from any external cause, irrespective of percentage, excluding neverthless, risks of loss or damage excluded by the F.C. & S.(free of capture and seizure) warranty or the strikes, riots, and commotion warranty. This insurance is subject to the follo American Institute clauses:

Amended F.C.& S. warranty(February 1949)

Marine Extension clauses (April 1943)

S.R. & C.C.Endorsement Form No.6-A(February 19

War risk Insurance Form B-N (February 1949)

The insurance should also provide for all risks coverage on each shipment, including during transit on land and during storage and installation period until completion of each individual project at the erection site. This all risks cov age would exclude war risk perils while on shore but should include war risk coverage on the ocean voyage. The risk of fire should also be covered during the period of storage on each individual site.

The rate quoted by the Indian Insurance Compan Association Pool for the above coverage is 0.85% which inclu for an erection period upto 31st December 1952. The rate of 0.85% quoted above is also subject to a special discount of 10% to this Department. If the erection period is delayed beyond 31st December 1952, the additional premium payable wi be settled by negotation by this Department at a later date, depending upon the actual period of completion of erection.

As for the settlements of any claims the Pool is agreeable to arrange for payment in U.S.Dollars although the premium is paid in rupees.

Please arrange for the necessary insurance poli with the Indian Insurance Co.'s Association Pool as above and intimate.,

35

intimate to us in due course.

Yours faithfully,

Chief Engineer.

Ref:- Your No.P.8699/51 dated 10-12-51.

With reference to the above and the further discussions your Shri P.R. Krishna Swami had with our Shri R.P. Desai, Superintending Engineer(Transmission), and Shri N. Subramanyam of Messrs. International General Electric Co., your quotation of 0.85% for the coverage mentioned in your above letter, and as amplified in our letter No.T.8/C-2/34925 dated 8-12-51 is acceptable to us. I note that the above rate is subject to a special discount of 10% to this Department as per your letter and will cove for the period of erection upto 31-12-52. If, however, the erection of the equipment is delayed beyond 31-12-52, the extra premium chargeable will be settled by negotiation at a future date notwithstanding the rates quoted by you in the above letter. As for the settlement of claims in U.S. dollars, we note that you are prepared to arrange accordingly through your bankers.

As Messrs. International General Electric Co., the suppliers of the equipment, are responsible for the delivery of the equipment at site and for the erection and setting to work, you may please contact them on our behalf for the insurance of the equipment. They will act as our agents for insurance also, and further correspondence and instructions in this connection may be taken up with them. They have also been addressed in this matter as per this office letter No.T.8/C-14/35434 dated 13-12-51 b.27 copy of which has been sent separately for your reference.

Please acknowledge the receipt of this letter.

Yours faithfully,

13.12.51.
Chief Engineer.

Copy of letter No.JKDH/A/2/1400 of 1951 dt. 29-12-51 from the E.E. (Civil) Jog-Karnatak Elec. Grid Div. Hubli to the A.G.Bombay.

Sub:- Jog-Karnatak Elec. Grid Scheme - Expr. on the -

As a required by sub-para 2 of Rule 234 of P.W.D.Manual, Volume I, I have to inform you that expenditure on the under-mentioned component parts of the Jog-Karnatak Elec. Grid scheme, administratively approved under G.R..P.W.D., No.GJK-1551 of 18th June 1951, is being incurred by me, pending technical sanction to the detailed estimates for the component parts by the Chief Engineer, Elec. Grid. There is, however, budget provision for expr. during the current financial year under the major head "81-A- Capital Outlay on Electricity schemes" as shown below:-

Name of work	Estimated cost in lakhs of Rs.	Budget provision.
1)Transmission lines.	86.89	26,09,400
2)Sub-stations	64.16	

The orders for purchase of equipments and other materials had to be placed well in advance in anticipation of technical sanction to the estimates due to uncertainty of their delivery periods, particularly when those materials had to be imported from foreign countries. The detailed estimates are under preparation in the office of the Supdg. Engineer, Elec. Grid Bombay and would be put up to the Chief Engineer, for sanction in due course.

No.PWVI-JK-1684

OFFICE OF THE ACCOUNTANT GENERAL,
Bombay, the 1/1952.

Copy forwarded with compliments to the Chief Engineer, Electric Grid, Bombay with a request to please state what steps are being taken to accord technical sanction to the estimates for the work in question. Under para 234 of B.P.W.D.Manual Vol.I, no work is to be begun unless properly detailed design and estimate have been sanctioned. The irregular procedure ~~brought to be~~ adopted in incurring expenditure of ~~xxx~~ over Rs.15105 lakhs need to be reported to Govt. for their consideration and orders.

.....

ELECTRIC GRID OFFICES.

Returned with compliments.

2. The estimate for the Jog-Karnatak Electric Grid Scheme administratively approved by Government under P.W.D. Resolution No. GJK-1551 dated 18-6-1951 comprises of the following parts :-

a)	Surveys	Rs. 1.51	lakhs
b)	Transmission lines	Rs. 86.89	"
c)	Substations	Rs. 64.16	"
d)	Civil Engineering Works	Rs. 26.11	"
e)	Rural Distribution	Rs. 27.41	"
f)	Interest during construction	Rs. 6.98	"
		Rs. 213.06	lakhs

3. The total capital outlay to end of 31-1-1952 amounts to Rs. 3,43,990/- as detailed below :-

	Amount of estimate	Capital Outlay to end of 31-1-52.
	Rs.	Rs.
a) Surveys	1.51 lakhs	60,354
b) Transmission lines	86.89 "	1,93,063
c) Substations	64.16 "	90,573
		3,43,990

4. Properly detailed working estimates in respect of item (a) Surveys have been prepared and sanctioned by the Chief Engineer. The work of preparation of detailed estimates for the remaining parts of the project estimates is in hand and will be completed shortly.

5 The orders for transmission line materials and substation equipments mostly of foreign manufacture were placed well in advance due to uncertainty of delivery periods after obtaining approval of Government from time to time. Since then, there has been a marked increase in the prices and the estimates are required to be readjusted and revised to keep them within the amount of administrative approval.

6,

6. It will be noted that expenditure against item (a) Surveys is properly incurred since detailed working estimates have been prepared and sanctioned. In respect of item (c) relating to substations, technical sanction has been accorded to ~~xxxx~~ sub-estimate amounting to Rs.4,50,930/- for the Colony buildings at Hubli. The expenditure against items (b) and balance of (c) transmission lines and substations is being incurred in anticipation of the sanctioned detailed estimates as a matter of urgency and that the following conditions will be duly observed in terms of provisions of article 235 of P.W.D. Manual, Volume I.

a) That for each component part there would be a corresponding item in the administrative approval as a whole;

b) that the amount of the detailed estimate does not exceed the amount included in the administrative approval by more than 10%;

c) and that the amount of all the technically sanctioned estimates will not exceed the amount of the administrative approval.

The statement in the Accountant General's endorsement No.P.W.VIx. JK/1684(a) dated 31-1-52 that an expenditure of over Rs.151.05 lakhs has bee incurred without detailed plans and estimates is no correct. The fact is that the amount of Rs.151.05 lakhs represents the estimated cost of items (b) an (c) of the sanctioned estimate for Rs.213.06 lakhs not the actual expenditure incurred during the year 1951-52. The actual expenditure upto 31-1-1952 aga items a, b and c of the estimate amounted to Rs.3,43,990/- only vide para.3 of my u.o. reference No.T.8/26/5382 dated 22-2-1952.

The estimates for some of the items have bee duly sanctioned technically and the rema-ining estimates are under preparation. They will be finalised and sanctioned technically as soon as the field data called for is received, within the next two months.

We the Citizens of Savanur do hereby unanimously resolve in a Pulbic Meeting held in the Majid High School, Savanur as under:-

' We understand thatthe electric supply from Jog Falls will be passing via Harihar, Ranibennur, and Haveri and a separate line will also be passing via Sagar, Sirsi Haveri and -- Bankapur to Hubli. As Savanur being an industrial and agricultural central place, having irrigation also, and since it is situated on the Pala-Badami Provincial road, We earnestly pray in the interest of public welfare that the advantage of the supply of electricity from Jog Falls may also be extended to our place, which is merged , though no other facilities or amenities have been conferred upon us. We also do hereby authorise the Administrator, Savanur Municipality, to submit a copy of this resolution to the Hon.Minister to Government P.W.D. Bombay and to deal with ~~with~~ further correspondences in this connection.

Subject:- Jog Electric Supply to Savanur..

No. ELE.S.R. 36 of 1951

Savanur Municipality,
Dated:- 18-6-51.

To,

The Hon. Minister to the Government of Bombay,

P.W.D. Bombay.

ACKNOWLEDGED
No. PWD-7
Date 27/6/51

Sir,

I am herewith submitting a copy of resolution unanimously passed in the Public meeting of the citizens of Savanur held in the Majid High School, Savanur. The citizens urge that the electric supply from Jog falls, may also include Savanur as it was the capital of Savanur State and as no other facilities have been conferred upon by Govt. after the merger of the State.

It is reported that the service lines from Jog falls will be passing from Haveri to Hubli via Bankapur. It is also said that another service line will be passing to Hubli via Sirsi and Tadas. As Gadag city is included in the area of supply, it will be a great obligation on the citizens of Savanur if the lines are taken to Gadag via Savanur Laxmeshwar Shirahatti and Mulgund . Savanur is an industrial town having a population of 14883 according to the census of 1951. The principal occupation of the people is gardening by irrigation and agriculture. There are about 500 gardens with a well for every garden. The supply of electricity to Savanur will also relieve the gardeners considerably for easily feeding the betal leaves plants and others. The betal leaves of Savanur are most famous in the whole Bombay Prosidency for their excellent quality and durability. They are even today exported to places like Karachi, Ahmednagar, Ahmedabad Bombay, Poona etc. It is on account of this importance that all the Ry. trains are made to stop at Savanur station invariably.

In view of the facts enunciated above, I on behalf of the citizens of Savanur, earnestly pray that Savanur may please be included in the area of supply from Jog falls.

PTO

may be acked.
22.6.51
C.E. B.E.G. may see for early

D.A.-Nil.

Copy forwarded to the Chief Engineer, Bombay Electric Grid, with reference to his No.P.3.C-DR-610 R/21779,dated the 30th July 1951.

Subject:- Supply of electicity
from Jog falls to Savanur....

77

No. ELC.S.M. 37 of 1951-52.
Savanur Municipality,
Dated:- 19-6-51.

To,

The Hon. Minister to the Govt. of Bombay,
P.W.D. Bombay.

Sir

It is reported that the electric service lines from Jog falls will be passing from Haveri to Hubli via Sankapur. It is also -- said that another service line will be passing to Hubli via Sagar Sirsi Haveri and Sankapur.

The Municipality has got an electric concern of its own at present, and is supplying private lights also. But on account of the non-avialability of engines and Generators of higher H.P. the present supply is far inadequate to suit the full public demand. There are pressing demands for supply of the same, but the Municipality is unable to meet the demands. The Municipality has also got water works, and water is distributed to the citizens by means of taps. There are now two oil engines working for 12 hours a day to pump up water required for taps. For want of highes power pumping -- equipment were unable to meet the public demands which is increasing day to day, and as a result the citizens are put to great hrdship for want of adequate supply of drinking water.

Savanur is noted for its beautiful gardens which produce betel-leaves of excellent quality. There are about 500 gardens and every garden has got a well for irrigation purposes. The gardeners have now got to spend a lot over bullocks and other things, which are used to draw water from the wells by means of [illegible]. The principal occupation is gardening by irrigation.

Besides these there are two cotton ginning and one pressing factory and several flour mills. Thus if Jog falls electricity is made available it ill be utilised for lighting streets, for providing private lights, for industrial and irrigation purposes, and good amount of energy will be consumed.

As Gadag city is included in the area of supply from Jog falls it is the earnest wish of the residents of Savanur that the -- service lines should be taken from Haveri to Gadag via Savanur, Lakmeshwar, Shirahatti and Mulgund, which is the shortest route as this is both in the interest of several big towns and Municipal areas and also of Govt. Under the circumstances, I earnestly request that Savanur may also please be included in the area of supply from Jog falls.

Yours faithfully,

Administrator,
Savanur Municipality.

) ~~November~~ December 1951.

To

The Administrator,

Savanur Mfdg, Savanur.

Sub: (same as at ¶. 13 ante)

Sir,

With ref. to your ¶.15 letter No ~~ELC.SR~~ ELC. S.R. 37, dated the 19.6.51 addressed to the ~~H~~M. P.W.D, Bldg, on the subject cited above, I am directed to invite your attention to ~~¶~~ G.L. No. GJK 1551K, of the 20.8.51 ¶.13 in reply to your earlier letter on the same subject, ~~of the No. ELC. S.R. 30, of the 18.6.1951~~ ¶.3.

2. I am to add for your information that the Govt. of Mysore have requested their inability to make available to the Bldg Govt. at present more power from Jog ~~Falls~~ and ~~therefore~~, when more power will be made available, the same will be utilised for the extension of the Grid Scheme.

Yours faithfully,

A.A.S.

I am also to state that the transmission lines to Gadag will be fed from the Hubli receiving station in the Jog-Hubli section and not from Haveri in the Harihar-Haveri section as stated in your letter quoted in para 1 above.

Below P.W.D. U.O.R. No. GJK 1551 dated 1st October 1951.

Electric Grid Offices.

The load prospects in the two sections (Jog-Hubli and Harihar-Haveri) of the Jog-Karnatak Electrification Scheme at the sanctioned centres are given in enclosures I and II, attached hereto. These details have been recentl collected by this Department. The consumers (except M.S.M. Railway workshop at Hubli whose load details are awaited) have confirmed their demands in all centres except at Dandeli. The promotors of the Aluminium factory and the West Coast Paper Mills at Dandeli are unable to give their exact requirements at present, which information, they say, can be had after the full particulars of the plant are obtained from the suppliers. The figures shown in the statements are those furnished by them on estimated basis.

As per the statement, the total diversified demand on the system in the Jog-Hubli section is 8164 KW in the 1st year and 9554 KW in the 3rd year of operation excluding transmission losses, the available power in this section being 10,000 KW at Jog; and 820 KW in the 1st year and 1620 KW in the 3rd year of operation in the Harihar-Haveri section, excluding transmission losses, the available power in this section being 1,500 KW at Harihar. From the above it will be seen that all the available power will be fully utilised and there will be no balance left for further distribution.

The transmission lines to Gadag will be fed from the Hubli receiving station in the Jog-Hubli section and not from Haveri in the

P.T.O.

Harihar-Haveri section as stated by the Administrator of Savanur and therefore the transmission lines will not be passing through Laxmiswar, Shirahatti, Mulgund etc.

After knowing the firm demands of the industries at Dandeli, the question of any modifications of load distribution will be considered.

The Executive Engineer, (Transmission),
Electric Grid Offices,
Mercantile Buildings,
Fort,Bombay.

Dear Sir,

Sub: Power Supply to Aluminium Industry
at Dandeli.

I am in receipt of your letter No.T.8/2/24910 enquiring the exact amount of power that would be needed pointing out the difference inour calculations. I must at once say that unless the plant is in fully working order it is not possible to give exact figures.

It is estimated we might need about 5,000 KW according to our present plans. In the conference on 20-3-1950 before the Hon'ble Minister we agreed to pay for a minimum of 2,000 KW, whatever the power consumption may be in the initial stages, We also stated the average consumption may be about 3,000 KW. The maximum, as already stated would be about 5,000 KW. This is according to what we have planned at present. The exact figures can be supplied only after the erection of the plant.

Yours faithfully,

Sd/-----

Dear Sir,

Sub:- Power Supply to Aluminium Industry
at Dandeli.

Ref: Your letter No. T.8/3/30687 dated 27th Oct.51.

We are in receipt of your letter of the 27th October 1951, mentioned above.

Due to the intergration of the States where our Bauxite properties are situated the Mining Leases, Prospecting Licenses etc. are being re-arranged by Government. It is not possible to say when exactly this work will be completed. We are, therefore, unable to give you immediately the exact date of the installation of our plant for refining Bauxite.

Thanking you,

Yours faithfully,

ATTORNEY.

109

No. P-13N-1/34630
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay 1: 5th December 1951.

To
Messrs. Singhi Sons Ltd.,
Camp. 191, VI Cross Road,
Gandhinagar - Bangalore City.

For attention of Shri Vyas Rao (Attorney).

Dear Sirs,

Subject:- Power supply to Aluminium Industry Dandeli.

We thank you for your letter No. A/50 dated 1st November 1951.

As stated by you in a conference with the Hon. Minister for Dev.& Labour on 20-3-1950 that you will pay for a minimum of 2000 KW irrespective of the power consumption in the initial stages and that your average consumption may be about 3000 KW, a load of 3000 KW has been earmarked for your industry at present. As only a limited quantum of power is to be made available to this Department by the Mysore Government a higher quantum of power cannot be allotted to you at present until arrangements are made for additional supply of power,. However, when more power becomes available from Mysore Government, your requirement of 5000 KW will be duly considered.

There is considerable demand for power in the area to be served with the Jog power. In view of the allocations of power already made to various prospective consumers in this area, new applications for power are not considered. However, it is desirable that all prospective large power consumers should enter into definite committments with this Department for supply of power in order to justify incurring of large capital expenditure by Government in the transmission and distribution system. It is accordingly proposed to enter into an agreement with you as per model form approved by Government for this purpose, a copy of which is enclosed herewith. One copy was previously supplied to you.

Regarding the rates for supply of power, I may state that the rates have not yet been determined for the Jog-Karnatak Electric Grid Scheme and hence the rate Schedule applicable to you has not been indicated in the draft agreement form. The rates will be worked out when the final costs of the scheme are known and will be announced some months before the supply is commenced. The rate structure will coveronly the actual cost of power payable to the Mysore Government, plus the cost of transmission of power, the operation and maintenance of the system and some percentage to cover the supervision charges. The Jog-Karnatak Electric Grid Scheme will be owned and operated by Government and therefore the rates charged will be reasonable and economical consistent with the costs, unlike commercial firms which have profit earning motives. As your factory would be operating at a very high load factor, the overall rate per unit to you will be lower than the rate applicable to industries having lower load factors.

I shall thank you if you will kindly return the draft agreement duly approved when further action will be taken to finalise same.

Yours faithfully,
Sd/----
(H.R.Vazifdar),
Executive Engineer (Commercial).

No.T.8/3/24846
Electric Grid Offices,
Mercantile Bank Building,Fort,
Bombay 1: 29th August 1951.

To

Messrs West Coast Paper Mills Ltd.,
(Under Floatation),
C/O Shri M.G.Kotibhaskar,
Krishna Kamal, Gokhale Road North,
Dadar Bombay 14.

Dear Sirs,

Subject:- Power supply to Paper Mills at Dandeli.

Reference:- Your letter of 18th June, 1951.

While you have stated in your letter referred to above that your power requirements will be 2500 KW (working twentyfour hours a day), you later informed on telephone that it will be 2500 HP. In case you are not in a position to give your exact requirements of electric power, please state what size of paper manufacturing plant (in tons per day)is proposed to be installed by you so that we may have an approximate idea of your power requirements. Also, please note that the rates for the supply of High tension energy will be based on (i) the charges of maximum demand per month, and (ii) Energy charges based on the total monthly consumption in KW hours.

In order to settle the allocation of the power supply to the various consumers at different substations early, I shall be glad if you will immediately intimate your firm requirements of power at Dandeli, and when you would be in a position to take supply.

Yours faithfully,

Sd/-

Dear Sir,

Re: Power Supply to West Coast Paper Mills Ltd.,
(Under Floatation) at Dandeli.

With reference to your letter No. T.8/3/~~27324~~ 24846 of 29th August, 1951 and the reminder No. T.8/3/27324 of 15th September I have to state that our power requirement would be 2500 KW for pulp and paper manufacture and 500 KW for caustic soda and chlorine electrolitic plant as stated in our application dated 28th June 1951.

It may take us about three years to take power supply which depends on the availability of machinery and collection of capital.

Yours faithfully,
For West Coast Paper Mills Ltd.,(Under Floatation).

Sd/------
(A.D.Chaudhari).

~~52~~ 115

No.P-13N-1/3545
Electric Grid Offices,
Mercantile Bank Building,Fort,
Bombay 1: 15th December 1951.

To

Shree A.D.Chandhari,
Jehangir Wadia Building,
Armenian Lane,
Fort, Bombay.

Dear Sir,

Subject:- Power supply to West Coast Paper Mills Ltd. at Dandeli.

Reference:- Your letter dated 17th October 1951.

We thank you for your above letter.

There is considerable demand for power in the area to be served with the Jog power. In view of the allocati of power already made to various prospective consumers in this area, new applications for power are not considered. However, it is desirable that all prospective large power consumers should enter into definite comittments with this Department for supply of power in order to justify incurring of large capital expenditure by Government in the transmission and distribution system. It is accordingly proposed to enter into an agreement with you as per model form approved by Government for this purpose, a copy of which is enclosed herewith. One copy was previously supplied to you.

B

Regarding the rates for supply of power, I may state that the rates have not yet been determined for the Jog-Karnatak Electric Grid Scheme and hence the rate schedule applicable to you has not been indicated in the draft agreement form. The rates will be worked out when the final costs of the scheme are known and will be announced some months before the supply is commenced. The rate structure will cover the cost of power payable to the Mysore Government plus the cost of transmission of power, and the operation and maintenance of the system and some percentage to cover the supervision charges. The Jog-Karnatak Electric Scheme will be owned and operated by Government and therefore the rates charged will be reasonable and economical ~~consistar~~ consistant with the costs, unlike commercial forms which have proft

profit earning motives. As your factory would be operationg a very high load factor, the overall rate per unit to you will be lower than the rate payable by other industries having lower load factory,.

Regarding the load demand, you have stated in the questionaire form that 2500 KW is required for paper and pulp manufacture in the 1st year and an additional 500 KW for electrolytic puposes in the 3rd year from the starting of the factory. When your Shri Kotibhaskar was contected by this office on phone he gave us to understand that 2500 H.P. was required and not 2500 KW in the 1st year (as stated in the questionnaire). Moreover, he said that he could not definitely say the load demand until he got some more perticulars from the manufactures. Your letter gives the requirements as 2500 KW for the pulp and paper manufacture. 1500 KW of power has been earmarked for your industry at present.

As a limited quantum of power is to be made available to this Department by the Mysore Government, a higher quantum of power cannot be alloted to you at present. Unitl arrangements are made for additional supply of power. However when more power becomes available from Mysore Government your additional requirement will be duly considered.

I shall thank you if you will kindly return the draft agreement duly approved when further action will be taken to finalise same.

yours faithfully,

Sd/-
Executive Engineer(Commercial).

Copy to Transmission Section for information.

Encl: Draft Agreement.

F 119 -

No. P13N-1/ 3246
Electric Grid Offices,
Mercantile Bank Building,
Fort, Bombay 1, ~~1 January 1952~~
1/2/52.

To

The Secretary to Government,
Public Works Department,
Bombay.

Sub: Jog-Karnatak Electric
Grid Scheme.

I invite attention to the statements furnished vide this office U.O.R. No. P13C-Gen/29758 dated 19th October 1951 giving the names and estimated demands of the probable H.T. consumers to be served under the Jog-Karnatak Electric Grid Scheme, a copy attached for ready reference (with addition of one more consumer at Dandeli). It will be observed from the statement that the available power is expected to be fully utilised by these loads. There is quite a good demand for power from this area, which, however, cannot be met on account of the limited availability of power from the Mysore Government.

It will be noted from statement I that there are two large industrial loads proposed to be served under this scheme viz. 3,000 kW for the proposed aluminiu plant of Messrs. Singhi Sons Ltd. and 1,750 kW for the proposed Paper Mill Factory of the West Coast Paper Mills Ltd., both to be located at Dandeli. As transmission lines from Kavalvad to Dandeli for a distance of about 19 miles will be put up mainly to serve these loads, it is essential to enter into a definite contract with these consumers for their power requirements from the Grid. Accordingly, they were addressed as per copies of correspondence enclosed herewith. So far no definite reply has been received from either of these consumers. It will be noted from their interim replies that neither of them specify the correct demand nor the time when they would be ready to receive power for operating their respective factories.

P.T.O.

It is understood that so far there is no move in regard to setting up of these two factories at site such as levelling of ground, foundation work, etc. They also do not seem to have placed any orders for the requisite plant and machinery and, therefore, it is doubtful if they would be ready to receive supply by the time Grid power is available to them which as per present estimates is programmed to commence in about 1953-54. As Government is incurring large capital expenditure for supply of electric power to these loads, it is very necessary that the development of these factories should be followed up by the departments concerned of Government. It is, therefore, requested that the Development Department in the case of the Aluminium factory and the Forest Department in the case of the Paper Mills may be requested to follow up this matter with the two ~~fac~~ parties concerned.

T. J. Meiklandaie
Chief Engineer.

Incl: as above.

K.

Submitted with reference to the Secy. D.D.'s note at p.28 ante.

2. The C.E.,B.E.G., has explained the position about the development of load at Dandeli vide details at p. ante. In connection with the load at Dandeli the C.E., B.E.G. has brought to the notice of Govt. that M/s. Singhi Sons who are to be allotted 3000 KW for their proposed alluminium factory and M/s. West Coast Paper Mills Ltd. who want 1760 KW for their proposed paper mills have not yet entered into definite contract for their power requiremen Neither of them has specified his correct demand nor the tim when the load would be required. These consumers do not seem to have paced any orders for the requisite plant and machinery and so far there is no move in setting up the factories. A transmission line for a distance of 19 miles, involving a large expenditure, is to be put up mainly to serve these two loads. It is essential therefore that these factories should enter into a definite contract with the Grid Deptt. for their power requirements without delay and should follow up the developments so as to be able to ready to receive the powers when it becomes available.

3. Please see in this connection the D.D. Secy. [redacted]te dt. 18-1-51. As regards the rates for [redacted] C.E. A has explained to these consumers the rea[redacted] portion marked 'A' on p.47 ante and 'B' on p.53 ante. These pps. may be referred u.o. to the D.D. and the A.& F.D. with a request to follow up the matter with the consumers.

Submitted with ref. to the P.W.D. note dated the 21st Feby., 1952.

2. Shri A.D.Chaudhari of the West Coast Paper Mill Ltd.(under floatation) was given to understand that Govt. would be prepared to enter into an agreement, embodying various concessions detailed in the G.R.,No.3745,dated the 17th Novr., 1950, provided the share capital necy. to start the Pulp and Paper Factory is collected within a period of one year from the date of issue of the G.R.referred to at 'A' above. Shri Chaudhari,however, approached in Novr,1951, for extension of time by three years for collection of share capital He was,thereupon requested in G.L.,No. 3745-III-J,dated the 17th Decr., 1951, to furnish information on certain points before consideration of his request. No reply has, however, yet been recd. from him has been reminded on the 14th March, 1952. As the things stand to-day, the prospects of collection by Shri Chaudhari of the requisite share capital and subsequent establishment of a Pulp and Paper Factory do not seem to be bright. It is,therefore, doubtful whether the party would agree at this stage to enter into a definite contract, as suggested by the P.W.D. for power requirement. Copies of relevant documents from these pps. are,however, being kept on the relevant pps. of this deptt. for necy. action.

3. These pps. may be returned u.o. to the P.W.D. with the foregoing note.

DEMI-OFFICIAL LETTER.

No.T.8/3/ 13200
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay,1. 7th May, 1952.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:-Jog-Karnatak Electric Grid Scheme
Power Supply at Dandeli.

Reference:-This office No.P13N-1/3246 dated 1-2-1952.

I invite reference to my above letter and have to state that I have not received any advice so far whether the proposed Aluminium Industry and Paper Mills loads will definitely materialize at Dandeli. For providing supply at Dandeli the Kavalvad-Dandeli Section of 110 kV line will have to be built and the Sub-Station at Dandeli erected. The cost of the Transmission line is about Rs. 6.1 lakhs and that of the sub-station about Rs. 6.4 lakhs. Of this, payments to the extent of about Rs. 5.1 lakhs on Substation equipment have already been made. Material for Transmission Line towers is already on order, so the balance of about Rs. 7.4 lakhs will have to be spent by the time the materials and equipment arrive at site and are erected. Besides these, about Rs,2 lakhs will have to be spent for the Sub-Station Technical Buildings and Staff quarters. The steamers bringing the major portion of the equipment meant for Dandeli Sub-Station have either arrived or are due to arrive shortly in the Bombay Docks. On their arrival at Bombay they will be railed to Dandeli as per present instructions to the contractors.

2. If the Transmission line from Kavalvad to Dandeli is constructed and the Sub-Station at Dandeli is erected, we will be able to supply the requirements of the Government Saw Mills and of the Plywood Factory whose total demand is about 240 kW for the 1st year of operation and about 530 kW for the 3rd and subsequent years of operation. This will leave about 3,570 kW for meeting the demands of any industry that may come up by the time the sub-station is ready. Dandeli is a good centre for the development of industries as it is in the centre of Forest wealth, the water of the Kalinadi is available and it is connected by rail. Providing electric Power will be an

additional.....

additional attraction for Industry in Bombay State. As soon as the present slump is over there is a good chance of the balance of the power available at Dandeli getting booked up. But the amount involved is nearly Rs. 15 lakhs and the equipment may remain un-utilized for some years. However, there is no immediate use for this equipment elsewhere. Owing to the large amount involved, the matter is brought to notice of Government.

3. If Government decides not to proceed with the line to Dandeli and the sub-station, we will not be able to give power supply to the Government Saw Mills and the plywood Factory and the equipment received for Dandeli will have to be stored in a suitable place.

4. I therefore request Government to kindly inform me within about a week whether I may allow the equipment to be railed to Dandeli as per present arrangement. Thereafter I should be advised as soon as possible whether I may go ahead with the construction of the Kavalvad-Dandeli line and the erection of Dandeli Sub-Station.

2. The works of the Jog Karnatak Grid scheme have advanced and as a lot of expenditure is to be incurred in giving supply to the two big consumers the Aluminium Industry and the Paper mills it is high time to know whether their load will definitely materialise or not. It is also essential that these concerns enter into a definite contract with the Grid Deptt. for their visible power requirements, without delay, and follow up the development so as to be able to be ready to receive the power when it becomes available. The A.D. and the A.E. had informed PP-6c-61 about two months back that they would take up the matter with the parties. The C.E. now states P-71 that steamers bringing the material and equipment for transmission line from Karwar to Dandeli for the above purpose have either arrived or are due to arrive shortly and on their arrival the the material is to be hailed

~~136~~ 136

hailed to Dandeli as per present instructions to the Contractors. If the above two consumers are not prepared to take supply and if therefore it is decided not to proceed with the line to Dandeli and the Sub-station, Grid Deptt. will not be able to give power supply to the Govt. Saw Mills and the Plywood Factory & the equipment hired will have to be stored in a suitable place. Now - The C.E. requests Govt. orders before 15-5-52 whether he should allow the equipment to be hailed to Dandeli or not. Please see the last para of his letter. The position for orders

12/5/52

The CE should give them a final notice, if consumers do not enter into agreement within seven days, failing agreement with Govt, failing a supply, it would be assumed that they do not need power. Even after some

22nd May 1952.

The Chief Engineer,
Electric Grid Offices,
Mercantile Bank Buildings,
BOMBAY -1.

Dear Sir,

Sub: Power Supply to Aluminium Industry at Dandeli.

Ref:- Your Letter No.T8/3/14238 dated 10.5.52.

We have received your letter No.T8/3/14435 dated 16th May 1952 on the above subject.

We have not yet been able to come to a final decision regarding our targets of production and the location of the Reduction plant etc., since our negotiations with the Government of Mysore are still incomplete. A new ministry was formed only recently and it requires some time before we could approach the said Government and complete our negotiations. We, therefore request you kindly to give us some more time when we may be able to come to a decision and can contemplate an agreement with the Government of Bombay regarding power supply,

Thanking You,

Yours faithfully,

Bombay 1. 24 May, 1952.

To -

The Secretary to Government,
Public Works Department,
Bombay.

Sub:- Jog Karnataka Electric Grid Scheme -
Power Supply at Dandeli.

Ref:- Government letter No.DJK-1551 A dated 13.5.52

As required in the above letter notices were given to Messrs. Singhi Sons Ltd. Banglore and Shri.A.D.Chaudhari of West Coast Paper Mills Ltd., Bombay ~~xxx~~ in this office letters No.T.C/3/14233 dated 16.5.52 and No.T.C/3/14232 date 16.5.52 respectively with copies endorsed to Government. I have now received a reply only from Messrs.Singhi Sons Ltd a copy of which is enclosed herewith. It is stated in the ~~xxxxx~~ letter that due to the formation of the New Ministry in Mysore State the firm requires some more time before they can complete their negotiations for locating their reduction plant in Mysore State. Therefore they have asked for some more time to come to a decision and contemplate an agreement with Bombay Government regarding the power supply for the Aluminium Industry at Dandeli.

No reply has been received from Shri.Chaudhari so far regarding the proposed Paper Mills at Dandeli.

In order to avoid demurrage & other storage charges the equipment meant for Dandeli substation are being sent to Dandeli.

I will report to Government during the course of next week if a reply is received from Shri.Chaudhari.

Chief Engineer.

Submitted with refce. to the secy's noti at p.74 ante.

2. The C.E., B.E.G had issued notices to Shri Chaudhari and Mfs. Singhi Sons Ltd. The former has not given any reply while the latter have asked for some time more to come to a decn in the matter.

3. Please see paras 3 and 4 of the C.E. B.E.G's letter at p-72 ante. The C.E. is sending the equipment, recently received, to Dandeli. P-89

4. The Transmission line from Kawalka to Dandeli, a distance of 19 miles, has been intended mainly to serve the loads of the above two parties. The cost of the transmission line is about Rs. 6.1 lakhs and that of the sub-station at Dandeli is about Rs. 6.4 lakhs. Please see in this connn the portion marked 'A' on p-71 ante. It will be seen from para 2 above that ~~the~~ it is doubtful whether the main loads for which the line is to be put up, may materialise or not. The C.E., B has however stated that

92

154

Dandeli is a good centre for dev. of industries vide para 2 of C.E's letter at p. 71-72 ante. If the line is constructed and the load of the Aluminium Plant and Paper Mills (total load of 4750 kW) do not materialise a big load will remain idle. If the line is not constructed the equipment may remain unutilised for some years. The C.E. has stated that there is no immediate use for the equipment elsewhere. The point whether the C.E. may now go ahead with the construction of the Kavalkad-Dandeli line and the erection of Dandeli Sub-station is for consideration. (A) X

thro D.E. (S)

11/6/52

12/6 Unless customers are assured for power purchase he may not go ahead with laying of transmission line &c. — Messrs Singhe & Sons may perhaps write again — they to state they require some more time.

12/6

D.S. (S&E)

Secy.

The CE has not sought orders as of yet. There is good prospect of load at Dandeli and when some of equipment ordered, it has to be used elsewhere, we hope not. Load will develop & other parties will come forward to utilise the load.

The Superintending Engineer,
Hydro Section, Electric Grid Dept.
Mercantile Bank Building, Fort,
Bombay.

Dear Sir,

Electric supply to our proposed pulp and paper mill at Dandeli.

I beg to confirm my conversation with you yesterday on the above subject.

Since the time Government was please to grant us the concessions, the money market has been going from bad to worse. The deliveries of machinery also have been different and its prices high.

While starting an industry of this magnitude, we have to see that the machinery prices do not lead us into an exeessive over-capitalisation which becomes a permanent handicap and that the delivery of machinery does not take an inordinately long period. As the tempo of rearmament is slowing down, we are hoping that the prices will come down and the deliveries of machinery will be easier.

Last year's poor monsoon also blasted our hopes of collect-ing even if a part of the capital

We are hoping to get a fair proportion of the capital from outside India and the last few weeks have been showing a favourable turn in our relations with us the U.S.A. In 1950, when I was in England, some hopes were hold out to me of some finance coming from there. Now that a general recession in prices has started, we have to wait to renew our negotiations until some kind of stability is in sight

In view of these circumstances, we have asked for two years' extension of our concessions from Government,provision of power for our proposed mills will be a help to us in negotiating for finance.

I would, therefore, request that provision for machinery and accessories should be made for our power supply and the actual erection may be taken up later.

We hope to be able to report some progress on our side within twelve months,

Yours faithfully,

Sd/-. M.G.Kotisbhaskar.

Dear Sir,

Subj:-Jog.Karnatak Electric Grid Scheme
Power Supply for Aluminium Industry
at Dandeli.

Ref:- Our letter dated 22-6-52
Your letter No.T.8/3/20715 of 15-7-52.

In referring you to your above letter dated 15-7-52 on the subject of power supply at Dandeli we beg to submit that the matter is still pending with the Govt. of Mysore and no definite conclusions have been arrived at in our negotiations with that Govt. We are therefore unable to say exactly when it will be possible for us to enter into an agreement with your Department for supply of power to our proposed plant at Dandeli.

Yours faithfully,

LETTER.

No.T.8/3/
Electric Grid Offices,
Mercantile Bank Building, Fort,
Bombay,1. 18 July, 1952.

To

The Secretary to Government,
Public Works Department,
Bombay.

Subject:-Jog-Karnatak Electric Grid Scheme
Power Supply at Dandeli.

Reference:-1)Govt.letter No.G.J.K.1551 K
dated 13-5-1952.
2)This Office letter No.T.8/3/15537
dated 28-5-1952.

Further to my letter No.T.8/3/15537 dated 28-5-5
I enclose herewith a copy of letter dated 27-6-1952 received from Shri.M.H.Kotibhaskar of Messrs.West Coast Paper Mills regarding Power Supply to their proposed paper mills at Dande It is stated in the letter that they have asked for two years extension of time for their concessions from Government and that they would be able to report some progress within twelve months.

In regard to the Aluminium Industry at Dandeli, I enclose a copy of letter dated 17-7-1952 received from Messrs Singhi Sons Ltd. stating that the matter is still pending wi the Government of Mysore. They are unable to say exactly when it will be possible for them to enter into an agreement with this Department for supply of power to their proposed plant a Dandeli.

In the circumstances the initial firm load at Dandeli is that of the Government Saw Mills and the Plywood factory whose total demand is about 240 kW in the 1st year of operation and about 530 kW for the 3rd and subsequent year of operation. However, as stated in my letter No.T.8/3/13200 dated 7-5-1952 Dandeli is a good centre for the development industries and provision of electric power will be an additi al attraction for industry in Bombay State.

I request to be informed whether the transmission line from Kavalvad to Dandeli may be constructed and the sub-station at Dandeli erected as originally included in the project report administratively approved by Government. This will also enable us to supply power for other applicants who may come forward earlier. As already stated in my letter

T.8/3/15537 dated..

P-84 FY 161

8/3/15537 dated 28-5-1952 the equipment meant for Dandeli Sub-Station are being sent to Dandeli in order to avoid demurrage and other storage charges.

Chief Engineer.

Submitted.

2. Please see the O.N. at pp.91-92 ante, especially the concluding portion of it marked 'X'. The C.E., B.E.G. has now approached Govt. for orders whether the transmission line from Kavalkad to Dandeli may be constructed and the Sub-Station at Dandili may be erected as originally included in the project approved by Govt. As regards the power supply to the Paper Mills and the Aluminium Industry at Dandeli for whom the extension of the line to Dandili is designed the C.E., has enclosed copies of further communications from them from which it will be seen that neither of them is able to say anything definitely in the matter, at present. Please see the Secy's note in this connection at p. 92 ante. The draft put up for approval may issue. As we are going ahead with the Scheme as already planned it is perhaps not necy. to consult F.D. in this matter
